Hi, I'm **Lukas**. I used to be a designer, but now I'm a **Design Engineer**.

End-to-end product delivery by one person: brand identity, UI/UX and scalable design systems in Figma — plus the production code to ship them. E-commerce themes, landing pages and full websites built daily with AI-assisted development, with strong branding and visual thinking throughout.

EXPERIENCE

Senior Product Designer & Design Engineer at **Simplicity**

2024 — Present

I own product design end-to-end and ship it myself: new features, marketing assets, e-commerce themes and landing pages — designed in Figma and built into production code with AI-assisted development.
